Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a tray with specific holding means for a drinking vessel, classified in class 220, subclass 23.86
- II. Claims 11-14, drawn to a plate with specific hand holding means class 220, subclass 575

The inventions are distinct, each from the other because:

Inventions I and II are separate and independent claimed inventions because they are in different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). For example, claims I does not rely upon the specific hand holding means for patentability as claim II does not rely upon the specific vessel holding means for patentability.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
